

Environmental Policy

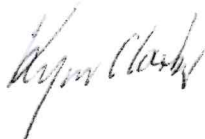

Kym Clarke Constructions envisages and strives to complete Construction Projects in a manner that reduces our ecological footprint through developing innovative solutions and management techniques. Kym Clarke Constructions is committed to the protection of the environment and sets environmental objectives. Our commitment to continual improvement of our Environmental Management System is an integral part of our Environmental System.

Kym Clarke Constructions acknowledges our position of responsibility and leadership as a well known Builder in the region and for that reason we will;

- Manage our operations in a manner consistent with sound environmental management principles
- Actively engage our team members, contractors and Clients in environmental management
- Support research in understanding and improving our environment
- Be innovative in our approach to our Construction activities and environmental values
- Remain aware of emerging trends in environmental issues, resource management and ecological values
- Work to prevent pollution
- Fulfil our Compliance obligations
- Actively communicate with our interested parties

Continually improving in environmental management is important to our way of doing business. We set out to achieve this by;

- Viewing compliance to legal standards as a formality – where possible we operate above best practice
- Operating our environmental management system is open, transparent and consultative
- Developing and implementing resource re-use programs, in particular building materials
- Avoid, minimise and manage the impact our actions have on the environment
- Identify key environmental issues
- Have strategies and plan for managing issues effectively
- Aiming for balance between the environment, society and the economy
- Follow a Plan Do Check Act model
